

My scene for our group project is a cityscape that has been decimated due to some form of destruction. My partners, Rajeev and Justin, created a tesseract bridge and a Avatar-ish nature scene. The later scene is supposedly full of life and colorful. However, my scene is devoid of that lively feel and specifically focuses on a feeling of emptiness and post-destruction. The visual of the scene is an imagined idea of the world breaking and floating off into nothingness. Platforms of float rocks are seen throughout the area. While there is no form of life, there are still remnants of them such as the skyscrapers and the TV screens. The only form of nature within the scene is a dying tree on the smallest floating land. My scene is basically something that is to come.
